

Orthodontic Training for General Dentists

The Brace Training Institute

Orthodontic training for General Dentists

General dentists are rapidly discovering the benefits of being able to offer orthodontic treatment to their patients. There has been a proliferation in courses (Inman, 6 month smiles as well as Invisalign and Clear Step) in recent years aimed at providing dentists with the knowledge to carry out straightforward orthodontic treatment. However many of these courses are expensive and limited to just one solution.

The Course

Do you want to be able to offer orthodontics as part of your cosmetic treatment plans?

Do you want to be able to offer a range of appliances to your patients and not be limited to just one brand?

This 6 day course will be delivered by Specialist Orthodontist, Dr Murtuza Hasnaini. As this course is being delivered by a specialist, it will cover all types of braces including traditional metal fixed braces as well as aesthetic (ceramic) bracket systems and Invisalign.

The course format will be a combination of lectures and hands-on practical treatment of patients but the emphasis will be on practical orthodontic teaching. The aim is to ensure that at the end of the training, general dentists are able to offer the full range of appliances to all their patients to treat simple malocclusions to a high standard.

To ensure participants get maximum benefit from this course, numbers will be limited to 8 attendees, allowing time for one to one tuition.

This course provides over 40 hours verifiable CPD

Why Dr Murtuza Hasnaini?

Murtuza is a Specialist Orthodontist with over 10 years experience in orthodontics. Murtuza has set up 4 successful orthodontic practices from new, operating as The Brace Orthodontic Group and located across England and Wales. He has diagnosed and planned treatment for almost 10,000 patients over the course of his career. He now mainly practices private orthodontics in the City of London with a particular interest in treatment for adults with cosmetic and invisible braces. Murtuza has gained extensive experience in a wide range of orthodontic appliances including Invisalign clear aligners and Incognito lingual braces and also regularly attends conferences to keep up to date with latest technologies.

Dr Murtuza Hasnaini

Murtuza has lectured to the British Orthodontic Society and the British Dental Association and is heavily involved with teaching having successfully trained 3 orthodontic therapists to date.

The location

The sessions will be held at The Brace Orthodontic Practice in the City of London which has great transport links from across London and surrounding counties. Our modern practice has a dedicated lecture room and five state of the art surgeries. (See page seven for map and directions).

Programme

Day 1 – Diagnosis and case selection

Theory

Examination and diagnosis

Classification of Malocclusion

Hands on: Complete examination and diagnosis of a patient. This is an opportunity to bring your own patient to be diagnosed and treatment planned with Dr Murtuza Hasnaini

Day 2 – Treatment planning and collection of pre treatment records

Theory

Selecting the correct tools for 'wow' clinical photography

Consent

Treatment planning

Treatment planning options and selection of the correct appliance

Hands on: Taking accurate silicone and alginate impressions and high quality photographs to be used for diagnosis and case acceptance. Your own patients can be planned and prepared for treatment.

Day 3 – Introduction to Orthodontics

Theory

The Risks of Orthodontics

Interceptive Orthodontics

Emergencies in Orthodontics

Hands on: Bonding fixed appliances. Bring your own patients ready for starting active treatment.

Day 4 – Active Treatment

Theory

Fixed appliances

Hands on: Adjustment and case progression with fixed appliances.

Day 5 – End of Treatment and Retention

Theory

Removable Appliances

Debonding fixed appliances

Retainers

Hands on: Debonding fixed appliances and retainers

Day 6 – Invisible Appliances

Theory

Successful case selection and treatment with Invisalign/Clearstep systems

Hands on: Taking Invisalign impressions, placing attachments and air rotor stripping

Each session will run from 9am to 5pm. The morning will consist of lectures and the afternoons will be for practical application. You can provide your own patients for the practical sessions meaning you can start offering Orthodontics at your practice straight away, carry out your first cases under the supervision of a Specialist, and keep the profit from the fees you charge. We can also provide patients for the practical sessions.

Your investment

£395 per day – plus lab fees and material costs.

Your investment includes:

- Lecture notes from all sessions
- One staff member free of charge
- Assistance with treatment planning or case review for any 2 cases during the course
- Lunch and refreshments on all training days

Money saving benefits

- You will cover the cost of this course by treating just one orthodontic patient at your practice! In addition if you provide patients for this course you keep all the treatment fees.
- With one staff member for free, your nurse will receive basic orthodontic training for free
- You will make a tax saving of approximately £1000 (40% of course fee)

Course dates and venue

The course will take place over 1 year with sessions every other month on a Friday.

Day one – Friday 20th January 2012, 9.00am

Proposed dates for subsequent sessions:

23rd March, 25th May, 6th July, 21st September, 23rd November.

The Brace Orthodontic Practice, 15 Artillery Passage, London, E1 7LJ
Nearest underground station - Liverpool Street.
