General dentists are rapidly discovering the benefits of being able to offer orthodontic treatment to their patients. There has been a proliferation in courses (Inman, 6 month smiles as well as Invisalign® and Clearstep) in recent years aimed at providing dentists with the knowledge to carry out straightforward orthodontic treatment. However many of these courses are expensive and limited to just one solution.

**The Course**

**Do you want to be able to offer orthodontics as part of your cosmetic treatment plans?**

**Do you want to be able to offer a range of appliances to your patients and not be limited to just one brand?**

This 9 day course, spread across one year will be delivered by Specialist Orthodontist, Dr Murtuza Hasnaini. As this course is being delivered by a specialist, it will cover all types of braces including traditional metal fixed braces as well as aesthetic (ceramic) bracket systems and clear aligners such as Invisalign®.

The course format will be a combination of lectures and hands-on practical treatment of patients but the emphasis will be on practical orthodontic teaching.

The aim is to ensure that at the end of the training, general dentists are able to offer the full range of appliances to all their patients to treat simple malocclusions to a high standard.

To ensure participants get maximum benefit from this course, numbers will be limited to 8 attendees, allowing time for one to one tuition.

You will be required to bring your own 2 new patients and perform the orthodontic treatment with the supervision from the orthodontist. The treatment cost agreement is between you and your patients.

**This course provides over 60 hours verifiable CPD**
Why Dr Murtuza Hasnaini?

Dr Murtuza Hasnaini, Specialist Orthodontist
BDS, MFDS, RCS, MSc, MOrth RCS

Dr Murtuza has been practising orthodontics for more than 15 years and has treated more than 10,000 patients.

He has gained extensive experience in a wide range of orthodontic appliances including Invisalign and Incognito lingual braces.

Dr Murtuza has given lectures at the British Orthodontic Society and British Dental Association. He is now more active in the Introduction to Orthodontic course at his practice in London.

In 2016, Dr Murtuza is the finalist for 2 Aesthetic Dental Awards - Best Orthodontics in Invisalign and Best Orthodontics in Fixed Braces.

“The course was nothing short of excellent and far exceeded my personal expectations”

Dr Mohammed Kassam, London
Programme

Lessons start at 9am and end at 5pm

**Session 1 – Diagnosis and case selection (1 Day)**

**Theory**
*Examination and diagnosis*
*Classification of Malocclusion*

**Practical**
*Hands on:* Complete examination and diagnosis of a patient. We will provide patients for you to diagnose and assess in pairs.

**Session 2 – Treatment planning and collection of pre treatment records (2 Days)**

**Theory**
*Selecting the correct tools for ‘wow’ clinical photography*
*Consent*
*Treatment planning*

**Practical**
*Treatment planning options and selection of the correct appliance*

*Hands on:* This is your opportunity to bring your own patients to be assessed and treatment planned with Dr Murtuza Hasnaini. This practical session will take place in the afternoon of the first day and for the whole of the second day.

**Session 3 – Introduction to Orthodontics (2 Days)**

**Theory**
*The Risks of Orthodontics*
*Interceptive Orthodontics*
*Emergencies in Orthodontics*

**Practical**
*Hands on:* Bonding fixed appliances. Bring your own patients ready for starting active treatment. This practical session will take place in the afternoon of the first day and for the whole of the second day.
Session 4 – Active Treatment (1 Day)

Theory
Fixed appliances

Practical

Hands on: Adjustment and case progression with fixed appliances.

Session 5 – End of Treatment and Retention (2 Days)

Theory
Removable Appliances
Debonding fixed appliances
Retainers

Practical

Hands on: Debonding fixed appliances and retainers. We will provide patients for you to debond and provide a demonstration of the placement of a fixed retainer. This practical session will take place in the afternoon of the first day and for the whole of the second day.

Session 6 – Invisible Appliances

Theory
Successful case selection and treatment with clear aligner systems such as Invisalign®/Clearstep systems

Hands on: Taking silicone impressions, placing attachments and interproximal reduction.
Your investment

£4455 - inclusive of material costs for fixed metal braces

Your investment includes:

• Lecture notes from all sessions

• Course manual to include consent forms, diagnostic templates, patient communications and equipment guide to use in your own practice

• One staff member free of charge

• Assistance with treatment planning or case review for any 2 cases during the course

• Lunch and refreshment will be provided

• You will cover the cost of this course by treating just two orthodontic patients at your practice! In addition if you provide patients for this course you keep all the treatment fees.

• With one staff member for free, your nurse will receive basic orthodontic training for free

• You will make a tax saving of approximately £1800 (40% of course fee)
